Environmental policy

NLMK DanSteel A/S' environmental policy follows NLMK Europe's and it means that we will work to:

- Continued development of the environmental work in preventing harmful effects of hazardous substances and materials and by minimizing noise and pollutant emissions to air, water and soil.
- Efficient use of natural raw materials and energy resources needed for our production.
- Utilize products and optimize waste disposal to the maximum possible recycling.
- Develop and improve our production methods where it is possible using cleaner technologies.
- Display environmental transparency and preparation of environmental targets and action plans to ensure that environmental policy is observed and may be published in the company's green accounts.
- Promote environmental awareness among our employees through information, training and education.
- Compliance with statutory requirements and regulations.
